- Improved front opening buckle w/smooth body adjuster system
- Enhanced shoulder fit system for the perfect fit
- Enhanced back profile for clean, unobtrusive look and fit
- Wide single leg strap with stowage pocket
- Includes: Sprayhood, Pylon, Lume-On Lifejacket Lights
- 170N Buoyancy
- One Size

Spinlock 6D 170N Pro Sensor ELITE Series Inflatable/Harness Deckvests

Water sensitive activation system

Uses a compressed paper capsule that dissolves and releases a spring to puncture the gas cylinder. (indicators to show status of cap and cylinder)
The cap is designed so that only water flowing upwards through the unit will cause it to activate. Water, spray and rain running down jacket will not cause activation

- One size
- UML Pro Sensor Elite activation system
- Improved front opening buckle with smooth body adjuster system
- Enhanced shoulder fit system for the perfect fit - every time - all day
- Enhanced back profile for clean, unobtrusive look and fit
- Hard wearing coated fabrics in key areas
- New sprayhood design with large clear structured visor - stored away from neck
- Firing system on rear of bladder for improved comfort & reduced snagging when inflated
- 40mm single leg strap with stowage pocket - extra wide, easy to find, easy to locate
- Pylon 360° lifejacket light fitted
- Lume-On bladder illumination lights fitted
- MOB1 AIS compatible
- 5 year warranty
- Cutter attachment point for non HRS models
- 170N buoyancy; also available with HRS (Harness Release System)

Spinlock Deckvest VITO Offshore 170N

Deckvest VITO is the latest Spinlock inflatable lifejacket harness technology, based on our design work for the Volvo Ocean Race. All teams were equipped with the same inflatable lifejacket harness developed in collaboration with a core group of Volvo offshore sailors.

Fundamental to the new design was a lifejacket that crews actually wanted to wear more frequently, with developed custom features.

- Striking design finish in durable rip stop fabric
- 170N buoyancy with Hammar hydrostatic automatic inflator
- Structured fit allows easy donning with simple to adjust buckles
- Course and fine tune adjustment. Fit lifejacket to body size.
- Fine tune adjust each time for layers
- Added protection in high impact areas
- New style structured sprayhood to reduce the risk of secondary drowning
- Pylon Lifejacket Light - high intensity, water activated flashing LED Light.
- 23cm flexible antenna wand gives improved visibility above head & water
- Lume-On - Lifejacket bladder illumination lights included
- Wider 40mm leg strap with stowage
- Toggle attachment point for optional Chest Pack (DW-PCC)
- Optional Ocean Signal AIS MOB1 available to purchase as a stand-alone unit or supplied fitted integrated within a Deckvest
- Weight: 1240g

HARNESS RELEASE SYSTEM (HRS™)

THE FIRST LIFEJACKET HARNESS TO INCORPORATE A HARNESS RELEASE SYSTEM

The Harness Release System releases the safety line from the lifejacket harness in an emergency, allowing the MOB to separate. Easy to find and operate in an emergency, the Harness Release System is an industry first; helping to address the question of managing a conscious MOB who is still attached to the boat being dragged behind. The Harness Release System can be fitted when the lifejacket is built or retro fitted by Spinlock on request after purchase.

ISO12402-1 Deck Safety Harness.
Soft loop attachment point for safety line, located on front of lifejacket for ease of access.

Lightweight release system built into harness system opening the harness loop attachment under load.

ISO12402-1 Deck Safety Harness
Soft loop attachment point for safety line can be released in an emergency to free a person from their safety line. Activation handle located behind soft loop, easy to locate, grab and pull

Soft loop attachment released and open. User separated from safety line and boat.

Spinlock Deckvest Lite +

- Harness version of the popular Deckvest LITE
- Lifejacket Harness with soft loop safety line clipping point
- Quick and easy to use anodised buckle
- Designed for the perfect fit - every time

Spinlock Aero Pro

Dynamic Body Profiled 50N Flotation Vests

The Aero Pro is a body profiled 50N flotation vest that utilises the latest durable high stretch woven fabrics. It is close fitting to the body ensuring a clean and ergonomic shape. The robust fabrics in key wear areas give protection where needed and the close fitting neck collar, sleeves and over length waist gaiter helps to reduce wind and water resistance to ensure it is as aerodynamically efficient as possible.

The unique outer construction of the Aero Pro houses the ultra flexible high buoyancy soft foam, plus optional accessories, and also meets test requirements of ISO12402. It features an optional D3O® back protector in the spine of the garment that is certified to exceed the performance requirements of EN1621 2:2014. It is compatible for use with a hydration bladder, features low profile stretch stowage pockets and provides access for a trapeze hook when worn over a harness.

- 50N Flotation vest for high agility sailing
- Durable high stretch woven construction for close fitting body
- Wrap around, close fitting neck collar, with offset adjustment and inner gusset
- Over length waist gaiter with trapeze hook opening
- Short sleeves
- Ultra flexible, high buoyancy soft foam
- High gloss cover finish to reduce wind and water resistance
- Low profile stretch pocket

Access pocket for optional:

- D3O® Impact Protection, Back Protector
or

- Hydration bladder with oral tube feed

Spinlock Lume-On Inflatable Vest Illuminator

- 2 flashing LED Lights (pair) illuminate the inflated lifejacket bladder to increase visibility and aid location
- Water activated - waterproof (IP68)
- Uses the inflated lifejacket bladder as a diffuser to increase visibility
- Attaches and integrates only in lifejackets with separate bladder and cover construction
- Sticks directly to underside of inflatable chamber
- Retail packaged as a pair of lights with stickers
- Standard feature on Deckvest 6D and Deckvest VITO

SPI DW-LMN

Spinlock Pylon Light

Fits most brands of inflatable vests.

Emergency beacon for improved visibility in the water

- 23 cm flexible antenna raises LED light above head and water
- Removes 57° head shadow giving a 14% increase in visible light
- Fully sealed LED with a minimum 0.75 Candela for 8+ hours
- Water activation, plus on/off switch
- Can be retro fitted to any inflatable lifejacket with adjusting strap
- Battery life indicator confirms 8 hours or more duration
- Compact low profile sealed lithium battery
- Fitted as standard on Deckvest 5D lifejackets
- 5 year shelf life

SPI DW-PY/L1

Approvals: SOLAS, USCG, MED,
CDN COASTGUARD AUTHORITY

Spinlock Spray Hood

- A spray hood reduces the risk of spray inhalation/secondary drowning
- Spray hood for 170N Spinlock lifejackets, including Deckvest 5D 170N, Deckvest LITE, Deckvest LITE+ and Deckvest DURO 170N

SPI DW-SHD/170*

[* Request Item](#)

Spinlock Performance Knee Pads

- Slim and low profile design for the ultimate long term comfort
- High flex panelling - moves with the leg and knee to ensure the kneepad stays in place
- High stretch, soft touch moulded foam provides patella support and protection
- Extra tough 'Tatex' construction moulded outer fabric protection
- Low volume back panelling prevents bulking
- Extra grip - Sticky rubber compound increases grip in all conditions

Spinlock Mast Pro Harness

- Extremely lightweight minimal design
- Super slim, structured waist belt spreads the load evenly over it's full width, for comfort with reduced bulk
- Unique Ratchet-Fit adjustment on leg straps for a secure, easy fit
- Ergonomic sculptured waist belt and super wide leg straps for added comfort and lumbar support
- Designed for use in the marine environment
- Marine grade stainless steel 'doubleback' buckles
- Tripping spike pocket - Accessible from both sides
- User replaceable leg strap elastics
- Tool attachment points
- Waist: 24" - 40", Leg: 18" - 25"

SPI DW-MPH

CE Approved 0120 Type C - EN12277

Spinlock Deck Pro Harness

- Super light, comfortable and easy to fit
- Wearable with Mast Pro harness
- Instantly fitted unique front opening belt system fits fast and securely first time, using '2T' fastener
- Quick adjust 'Doubleback' buckles in stainless steel
- Shoulder straps are shaped towards the centre of the chest, for exceptional comfort and freedom of movement
- Lightweight tether attachment loop
- Knife pouch accessory

SPI DW-DPH Chest: 37.5" - 46.5"

Spinlock Cutter & Pouch

- 'S-Cutter' is made for severing safety lines under load by providing a reliable 'means of disconnection'
- Anyone wearing the Cutter satisfies ISAF and ORC recommendations, whatever type of safety line and whatever the type of clip used

With a guarded razor edge and stowed either in the special pocket on the Deckvest or in a simple pouch worn on the life jacket harness.

SPI DW-CTR

Spinlock Wrist Support

A high strength elastic wrist wrap designed to provide custom support and aid central and lateral wrist stabilization for long periods of time helming and grinding.

SPI DW-WSP Universal, pair

Wichard Safety Tether

- Elastic harness tether with 2 stainless steel carbine hooks
- Retracts from 2 to 1 meter
- Break load 4580 lbs
- Compliant with European standard EN 1095

WIC 7001

Spinlock Performance Safety Lines

- Up to 50% lighter and more compact than conventional safety lines
- Easy to use lightweight clip with wide opening gate
- Webbing 'Dry Coated' to reduce water absorption & stay lighter for longer
- Overload Indicator

- Single clip, elasticated 2m

SPI DW-STR/2LE/C

- Double clip, elasticated 2m

SPI DW-STR/02E/C

- Double clip, 1 x elasticated 2m, 1 x non-stretch 1m

SPI DW-STR/3L/C

- Triple clip, 1 x elasticated 2m, 2 x non-stretch 1m

SPI DW-STR/03/C

Wearing the a stowed (optional) safety line 'cutter', any safety line will satisfy ISAF and ORC recommendations by providing a means of disconnection under load.

Mustang Survival Suits

Designed for use in commercial operations, the new Immersion Suit from Mustang Survival is the ideal ship abandonment suit for workboats, transport vessels, drilling rigs, supply ships, steamships and commercial fishermen. Also suitable for the sailing community.

- Easy to don in stormy conditions
- Five-fingered insulated gloves for warmth and dexterity
- Water-tight face seal
- Includes buddy line
- Includes deck safety harness
- Ankle adjustments for a better fit
- 5mm fire retardant neoprene provides flotation and hypothermia protection
- Triple-sealed seam construction
- Non-slip, durable soles
- SOLAS grade reflective tape for night time or foul-weather detection
- SOLAS grade hailing whistle
- Comes with IMO approved light
- Includes instructions and inspection manual
- Includes zipper lubricant
- Custom crew identification markings available

Part #	Size	Height	Weight
SVT MIS220TC	Small	47" - 67" 119cm - 170cm	88lbs - 220lbs 40kg - 100kg
SVT MIS230TC	Universal	59" - 79" 150cm - 200cm	110lbs - 331lbs 50kg - 150kg

Mustang

Ocean Commander Immersion Suit

- Transport Canada/SOLAS/MED approved immersion suit
- Fluorescent yellow-green
- Hood offers a water-tight fit; face seal gives top protection from exposure
- Full length body zipper gives a water-tight seal
- 5 mm neoprene removable mitts provide warmth and stow in sleeve pockets
- Non-slip durable rubber soles provide traction on wet surfaces
- Detachable inner buoyancy liner constructed of closed-cell AirSoft foam for maximum flotation and thermal insulation; liner can be un-snapped and removed in-the-field
- Inflatable head pillow supports the head at an optimum flotation angle and provides additional buoyancy
- Reflective tape on shoulders and arms aids in night time detection; whistle and buddy line included
- Welded nylon outer shell provides waterproofness; high performance urethane coated nylon exterior makes repairs and cleaning easier
- Neoprene wrist seals allow for easy donning and a better seal
- Built in safety harness
- Includes ACR Hemilight Water Activated Personal Locator Light (MI5732)

SVT OC8003HR Universal

What is "Clo" and what does it mean?

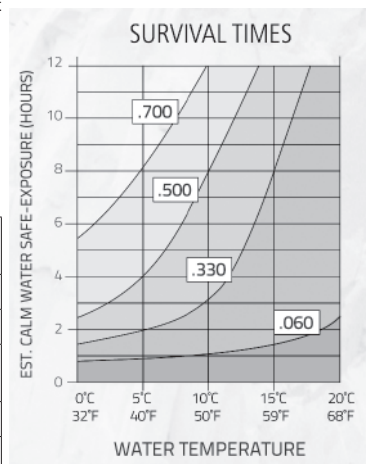

"Clo" is a measurement of the thermal comfort of a suit or device (CLOthing Insulation). One "Clo" represents the thermal comfort of an average person in business clothing in a room temperature indoor environment. Fractions of this thermal comfort are what are perceived when worn in the water. Each of the values are below 1.0 because water transfers heat out of the body 25 times faster than air.

Our products are interlined with our exclusive AirSoft™ closed cell foam. This foam not only provides maximum insulation against the cold, it also keeps you afloat to protect you from drowning.

Wearing a Mustang Survival suit will increase cold water survival time exponentially

This graph indicates random samples of Clo values and the corresponding estimation of survival time in calm water (assuming a thin person with a 5.5°F [3°C] drop in core temperature).

PROTECTION	CLO VALUE
NUDE	0.060
CLOTHED	0.100
MC5445 with MP4240	0.170
MSD624	0.660
IC9002 02	0.960

FirstWatch Inflatables

Hi performance 33gram inflatable PFD designed for comfort, safety and utility.

- Manual or Automatic available
- 35 lbs buoyancy when inflated (150N)
- Neoprene collar for comfort

Mustang Elite 28 Inflatable - Automatic

- Aerodynamic 3D chassis reduces drag at high speeds
- Shaped for optimum mobility comfort
- Shoulder system eliminates neck fatigue
- Lightweight fabric shell, also used in the body armor industry
- Wicking mesh liner improves breathability
- Hydrostatic Inflator Technology will automatically inflate under water pressure, not inadvertently in rain, spray or humidity
- Provides 28lb (125N) buoyancy when inflated - more than 1.5 times the buoyancy of standard foam PFDs
- Fluorescent yellow-green inflation cell with retro-reflective tape for improved visibility in water
- Backup oral inflation tube
- Includes safety whistle
- Status indicator window: green means it's ready to go
- Sleek inflation handle prevents interference or snags
- Buckle & D-ring

Mustang Hydrostatic Inflatable - Automatic

The Inflatable Lifejacket with H.I.T. is the first Transport Canada approved lifejacket in Canada. The Hydrostatic Inflator Technology offers reliable inflation in a low maintenance design that will only inflate when submerged in 4 or more inches of water and not inadvertently due to rain, spray or humidity.

- IF auto hydrostatic inflator technology
- 5-year maintenance-free inflator
- SecureZip closure
- Light weight and comfortable design
- Neoprene Comfort Collar
- Provides 35lb of buoyancy when inflated
- Cylinder is contained inside bladder to protect against corrosion
- Durable heavy duty polyurethane coated nylon
- Strobe light holder, safety whistle and SOLAS reflective tape on inflation cell
- Approval: TC Marine - CAN/CGSB 65.7-2007, Class 1, Category 2A

Mustang Hydrostatic Inflatable High Visibility ANSI - Automatic

A new hydrostatic inflation technology, and a durable, easy-to-repack SecureZip PFD closure system. Hydrostatic pressure is applied to objects submerged in water. The new hydrostatic inflator needs only to be submerged 4 inches (10 cm) for hydrostatic pressure to open a pressure valve which releases a firing mechanism that automatically inflates the PFD.

- High visibility ANSI approved fluorescent yellow-green cover
- 64 sq. in. of ANSI reflective tape
- Back flap with reflective tape
- Hammar IF auto hydrostatic inflator is maintenance free for 5 years
- Neoprene comfort collar
- 35 lb buoyancy when inflated
- Durable 420-Denier nylon and heavy duty polyurethane coated nylon
- Strobe light holder, safety whistle and SOLAS reflective tape on bladder
- Backup oral inflation tube
- D-ring for kill switch attachment
- USCG - UL1180 - TC/Cdn Coast Guard approved PFD

You must know which activities and conditions inflatables are approved for:
Remember that you have to be wearing an inflatable PFD for it to be approved on an openboat.
If the boat is not open, then you only need to wear the PFD while you're on deck or in the cockpit.

*(H) Hydrostatic activation

FYI Safety Requirements

For recreational boats in Canada (also known as Pleasure Craft) there is a legal requirement to have:

"One Canadian approved personal flotation device or lifejacket of appropriate size for each person on board"

The difference between lifejackets and PFD's.

Where a traditional lifejacket had approximately 35lbs of buoyancy, a PFD has a minimum of 15.5lbs of buoyancy. Where lifejackets were designed to self-right people into a face up position in the water, PFD's do not. PFD's do have a marginally higher amount of flotation in the front of the product to achieve a safe flotation angle, but they are designed for comfort as well as safety.

The evolution of traditional PFD's, and now inflatable PFD's has placed the onus on the consumer to make an appropriate choice for their activity and to wear their product in order to be safe.

Lifejackets

Lifejackets come only in red, orange and yellow so you are much more visible while in water. Currently, there are three Canadian-approved types to choose from:

Safety of Life at Sea (SOLAS) lifejackets meet very high performance standards and are approved for all vessels.

- Will turn you on your back in seconds to keep your face out of the water, even if you are unconscious
- Come in two sizes: for those over 32 kg (70 lbs.) and those less than 32 kg
- Are available in comfortable and compact inflatable configurations that can be automatically, manually or orally inflated

Standard Type lifejackets are approved for all vessels, except SOLAS vessels.

- Will turn you on your back to keep your face out of the water, even if you are unconscious
- Come in two sizes: for those less than 40 kg (88 lbs.) and those greater than 40 kg

Small Vessel lifejackets are approved for small vessels.

- Have less flotation than Standard Type lifejackets
- Will turn you on your back, but may do so more slowly
- Come in two models: keyhole and vest; and
- Come in three sizes

Personal Flotation Devices (PFDs)

This type of flotation device is approved for pleasure craft only. You can choose from a wide range of approved types, sizes and colours of PFDs. They do not all come in red, orange or yellow; but it is a good idea to choose one of these colours so you are much more visible when in water.

Choose a PFD based on your needs and the activity you will be participating in. If you plan on operating at high speeds, look for a PFD with three or more chest belts for security. If you will be operating in cold water (water less than 15°C) choose a PFD with some thermal protection. A large selection of devices designed for specific uses are now available for all types of activities such as sailboarding, kayaking and canoeing.

There are, however, some pros and cons to choosing a PFD over a lifejacket. A PFD may be more comfortable than a lifejacket because it is designed for constant wear, but PFD usually offer less flotation than SOLAS, Standard Type and Small Vessel lifejackets. Although they have limited turning capability, some PFD provide thermal protection against hypothermia. The choice is yours, but consider your needs carefully before purchasing.

Inflatable PFD are another option but for them to work properly you must understand their operation and maintenance requirements. You should also check which boating activities they are approved for, under the Small Vessel Regulations. For example, people less than 16 years of age or who weigh less than 36.3 kg (80 lbs.), and operators of personal watercraft are prohibited from wearing an inflatable PFD
